

Reel Asset & Animation Plan

"You Don't Need a Mac Team to Ship an iOS App" — 60s reel, source: The Rundown AI guide on shipping an iOS app with Codex + Xcode + App Store Connect.

1. Asset & Animation Manifest

Every visual element below already exists in this repo — nothing here needs to be newly designed or licensed. Paths are relative to the repo root.

Scene / Time	Asset	Type & Source	Role in scene
Scene 1 0:00–0:04 <i>Hook</i>	assets/logos/gilbarbara/apple.svg	Logo · gilbarbara/logos (CC0)	Anchors the claim to Apple/App Store instantly
	assets/icons/tabler/device-mobile.svg	Icon · tabler-icons (MIT)	Phone frame motif behind the headline
	reel-app/src/Human.jsx (Short + PointingUp + SkinnyJeans)	React illustration · humaaans (MIT)	Person pointing — "look at this" framing device, bookends with Scene 10
Scene 2 0:04–0:08 <i>Twist</i>	assets/illustrations/flowbite/3d/light/ma n-question-marks.svg	Illustration · flowbite-illustrations (MIT)	Visualizes the "well, almost" retraction beat
Scene 3 0:08–0:14 <i>Reframe</i>	assets/logos/gilbarbara/openai-icon.sv g	Logo · gilbarbara/logos (CC0)	Left half of split screen — the AI agent (Codex)
	assets/icons/tabler/terminal-2.svg	Icon · tabler-icons (MIT)	Right half — Xcode/IDE stand-in (no official Xcode mark in our set)
	assets/logos/gilbarbara/apple.svg	Logo · gilbarbara/logos (CC0)	Small accent tying the right half back to Apple
Scene 4 0:14–0:20 <i>Step 1</i>	assets/icons/tabler/file-text.svg	Icon · tabler-icons (MIT)	Project scan target
	assets/icons/tabler/tag.svg	Icon · tabler-icons (MIT)	Version
	assets/icons/tabler/git-commit.svg	Icon · tabler-icons (MIT)	Build number
	assets/icons/tabler/photo.svg	Icon · tabler-icons (MIT)	App icon
	assets/icons/tabler/shield-check.svg	Icon · tabler-icons (MIT)	Signing setup
	assets/icons/tabler/circle-check.svg	Icon · tabler-icons (MIT)	Ticking checklist motif (reused in Scenes 6 & 9)
	assets/animations/svg-spinners/svg-cs s/ring-resize.svg	Animation · svg-spinners (MIT)	Ambient "scanning" ring behind the checklist — seeked, see §3
Scene 5 0:20–0:26 <i>Step 2</i>	assets/icons/tabler/currency-dollar.svg	Icon · tabler-icons (MIT)	"\$99/yr" stat
	assets/icons/tabler/clock.svg	Icon · tabler-icons (MIT)	"48 hrs" stat
	assets/logos/gilbarbara/apple.svg	Logo · gilbarbara/logos (CC0)	Reused from Scene 1/3 — visual continuity for "Apple's gate"
Scene 6 0:26–0:34 <i>Step 3</i>	assets/icons/tabler/search.svg	Icon · tabler-icons (MIT)	Magnifying-glass sweep = "audit"
	assets/icons/tabler/list-check.svg	Icon · tabler-icons (MIT)	Checklist body

Scene / Time	Asset	Type & Source	Role in scene
	assets/illustrations/flowbite/3d/light/authentication-form-fields.svg	Illustration · flowbite-illustrations (MIT)	Signing/export-compliance visual
	assets/icons/tabler/circle-check.svg	Icon · tabler-icons (MIT)	Evidence ticks (motif reuse)
Scene 7 0:34–0:42 Step 4	assets/illustrations/flowbite/3d/light/document-folders.svg	Illustration · flowbite-illustrations (MIT)	Privacy policy / support page
	assets/logos/gilbarbara/notion-icon.svg	Logo · gilbarbara/logos (CC0)	Where the docs get published
	assets/icons/tabler/archive.svg	Icon · tabler-icons (MIT)	Xcode archive step
	assets/icons/tabler/upload.svg	Icon · tabler-icons (MIT)	Upload to App Store Connect
	assets/logos/gilbarbara/apple.svg	Logo · gilbarbara/logos (CC0)	Destination anchor, 3rd reuse
Scene 8 0:42–0:50 Warning	assets/illustrations/flowbite/3d/light/password-lock-key.svg	Illustration · flowbite-illustrations (MIT)	Hero visual for the security caveat
	assets/icons/tabler/alert-triangle.svg	Icon · tabler-icons (MIT)	Warning marker
	assets/icons/tabler/key.svg	Icon · tabler-icons (MIT)	2FA codes
	assets/icons/tabler/lock.svg	Icon · tabler-icons (MIT)	Passwords
	assets/animations/cssshake/cssshake-little.css (class only, seeked)	Animation class · cssshake (MIT)	Small shake on the warning icon for emphasis — seeked, see §3
Scene 9 0:50–0:55 Pro tip	assets/icons/tabler/alert-circle.svg	Icon · tabler-icons (MIT)	The Apple error message
	assets/icons/tabler/message-circle.svg	Icon · tabler-icons (MIT)	Pasting it into Codex
	assets/icons/tabler/arrow-right.svg	Icon · tabler-icons (MIT)	Flow arrow
	assets/icons/tabler/circle-check.svg	Icon · tabler-icons (MIT)	Resolved next step (3rd reuse of this icon)
Scene 10 0:55–1:00 CTA	reel-app/public/profile.jpg	Photo · user-provided	Profile photo, standard CTA card
	reel-app/src/Human.jsx (same character as Scene 1)	React illustration · humaaans (MIT)	Closes the visual loop opened in Scene 1

All icon/logo/illustration licenses are MIT or CC0 — see assets/ATTRIBUTION.md for the full per-source breakdown and the trademark/nominative-use note that applies to the Apple, OpenAI and Notion marks used here for identification purposes.

2. Mixing & Matching Strategy

2.1 One icon language, three sources, zero visual clash

Tabler carries the entire functional/UI layer (files, checkmarks, dollar signs, locks) because its outline weight and 24x24 grid are consistent across ~180 curated icons — mixing tabler with a second outline set inside the same scene would read as sloppy. Flowbite's 3D-rendered illustrations are reserved for the "human moment" in each act (uncertainty, authentication, security, privacy) because their soft-shadow style reads as a beat change, not a UI update — they only appear alone or with a plain wordmark, never stacked next to a second illustration. Brand logos (Apple, OpenAI, Notion) are the only full-color elements in an otherwise monochrome/outline reel, which keeps them legible as "real product" anchors rather than decoration.

2.2 Repetition as a storytelling device, not laziness

Three icons are deliberately reused rather than swapped for variety: the Apple logo (Scenes 1, 3, 5, 7) marks every point where the story hits a wall only Apple can open — by Scene 7 the viewer recognizes it instinctively as "the gatekeeper." The circle-check icon (Scenes 4, 6, 9) is the reel's single "progress" signifier, so the audit in Scene 6 and the resolved error in Scene 9 both read as continuations of the same checklist from Scene 4, not new concepts. The humaaans figure opens Scene 1 pointing at the claim and closes Scene 10 in the same pose next to the handle — a visual rhyme that makes the 60 seconds feel like one loop instead of ten disconnected cards.

2.3 Motion budget: what actually needs to move vs. what just cuts

Every scene keeps the existing reel grammar — entrance easing (scale 0.92→1, opacity fade, easeOutCubic) plus a slow idle sine-wave pulse, exactly as in the previous two reels — so no new animation primitives are introduced. Two scenes get one extra motion layer each, chosen because the beat calls for it, not by default: Scene 4's audit ring (svg-spinners) suggests active scanning behind a static checklist, and Scene 8's icon shake (cssshake) is the one moment the reel needs to feel urgent rather than calm. Every other transition is a hard cut plus the standard entrance — adding motion everywhere would blunt the two scenes where it actually matters.

2.4 Technical requirement: seeking the borrowed animations

svg-spinners and cssshake both animate on the browser's real-time clock by default, which conflicts with this repo's deterministic window.__seek(t) render pipeline (documented in assets/ATTRIBUTION.md). Both instances in this reel must be paused (animation-play-state: paused) and driven per-frame with el.style.animationDelay = `-\${localT}s` inside the scene's render() callback, the same pattern already used for the counting-stat and progress-ring elements in the existing reel.html files. Without this, the scan ring and the warning shake will play back at the wrong speed once encoded to 60fps.

2.5 Color logic

Green (#4ade80) is reserved for "resolved/good" states — every circle-check tick, the final next-step card in Scene 9. Amber (#fbbf24) marks stakes/attention — the \$99/48hr stat card and the Scene 8 warning icons. This two-color signal system is the same palette the two prior reels already use, so a viewer who's seen either earlier reel reads "green = good, amber = pay attention" instantly without new learning.
